***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 9/02/2010 has been entered.

***Acknowledgements***

This supplemental allowance replaces the allowance previously issued on 8/05/2010. The purpose of this supplemental allowance is to correct some minor errors that were detected after issuance of the allowance on 8/05/2010. Specifically, this supplemental allowance:

- acknowledges the IDS submitted on 9/02/2010; and
- acknowledges the specification amendments submitted on 8/13/2010.

***Specification***

Amendments to the specification submitted by the Applicant on 8/13/2010 are acknowledged and accepted. The amendment is directed toward eliminating an erroneous citation contained within the original specification and does not introduce any new matter.

***Allowable Subject Matter***

**Claims 1-4, 7-11, 14-18, 21-25, 28-32 and 35-40** are allowed.

***Reasons for Allowance***

The following is a statement of reasons for indication of allowable subject matter. The prior art fails to teach or suggest the limitations of:

"wherein the criteria in the determining step [for applicability of an invoice discount] include maintaining a zero outstanding charge by the customer." (as in Claim 1).

Such limitation is present in all independent claims.

It is old and well known in the art to utilize a computer system to calculate an invoice amount, generate an invoice with the calculated invoice amount, and transmit said invoice to a customer for payment.

Furthermore, it is also old and well known in the art to authorize payment and make a payment against said invoice in advance of the due date of the invoice. Such advance or early payments are known to be rewarded with discounts against the invoice amount.

The instant application distinguishes from these old and well known practices by stating that application of a discount is contingent upon the maintenance of a zero outstanding charge (i.e. zero past due amount) by the customer.

Kitchen (US Patent 6,289,322) discloses a method/system for calculating an invoice amount, generating an invoice with the calculated invoice amount, and transmitting said invoice to a customer for payment. (see abstract). Neither this patent, alone nor in combination with others, discloses nor suggests the feature of applying a discount to the invoice amount.

Gafney (Gafney, Leo. *Practical Merchandising Math*. John Wiley & Sons. 1996. pp. 12-16 and 19-20) discloses a method/system for applying a discount against an invoice amount, said discount contingent upon payment before the due date of the invoice. (see p. 14). Neither this non-patent literature, alone nor in combination with others, discloses nor suggests the feature of applying a discount to the invoice amount contingent upon the maintenance of a zero outstanding charge (i.e. zero past due amount) by the customer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
